

# Research Volunteers Needed

Study of Cognitive Performance in Individuals with Type II Diabetes (T2DM) and/or Nonalcoholic Fatty Liver Disease (NAFLD)

- We are currently running a research study to measure cognitive performance and quality of life among individuals with Type II Diabetes and/or Nonalcoholic Fatty Liver Disease, as well as a healthy control group, aged between 18 and 69.
- Screening assessment and study participation is entirely voluntary.
- Compensation will be available for time and travel.
- This is a one-time study visit.
