

Our Better Outcomes Speak Volumes

Inova Joint Replacement Center

When it comes to orthopedic procedures, you want the best for your patients. As a physician, you know that volumes and quality go hand-in-hand. The **Inova Joint Replacement Center (IJRC)** is the largest single hospital-based program in the Mid-Atlantic region, performing nearly 2,000 procedures annually.

Of course, volumes only tell part of the story. It's the team, and our outcomes that make the difference. The IJRC is one of the few programs in the Commonwealth of Virginia to earn the Gold Seal of Approval for hip and knee replacements.

Our staff includes board-certified orthopedic surgeons, specially trained nurses, therapists and other healthcare professionals working together to ensure all patients receive high-quality care tailored to meet their individual needs.

A Full Continuum of Services

The **Inova Joint Replacement Center** offers a full continuum of services designed to make the patient experience as seamless and convenient as possible.

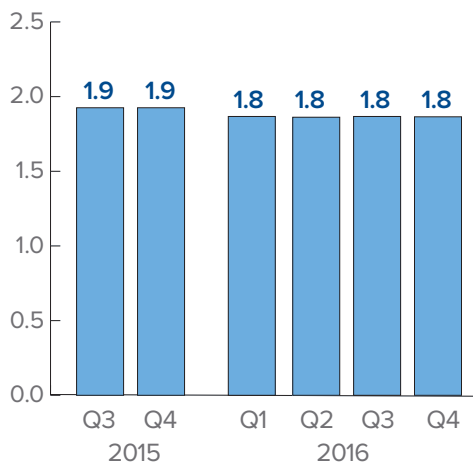

These include:

- A single point of contact for all insurance needs
- Pre-op appointments and one-on-one meetings with the care team, all scheduled on the same day
- Pre-surgery online orientation
- Rehabilitation services
- Case management services
- Arrangement of special equipment at discharge
- Coordination of home health services
- Private rooms

Pre-op Teaching Accelerates Healing

Studies have shown that patients who have identified a coach and receive pre-operative education enjoy better outcomes. Patients are encouraged to choose a coach to accompany them all the way through discharge from Inova Mount Vernon Hospital. Nearly two-thirds of our patients arrange to have a coach accompany them to pre-op and post-op sessions. This leads to shorter hospital stays and an increased likelihood of being discharged directly home. More than 80% of IJRC patients have attended an orientation session, viewed an orientation video (or were excused from orientation because they had joint replacement surgery within the past 12 months or were an emergency case.)

A Good Team Leads to Better Outcomes

It takes a unified team to provide consistently superior outcomes. A well-informed referring physician, an educated patient and the committed professionals at the Inova Joint Replacement Center working together are the key pieces that lead to reliably successful outcomes. Our outcomes consistently outperform national averages.

**Number of Procedures 2016
Total = 1,926**

Inova Joint Replacement Center has again earned “high performing” recognition in orthopedics.

The Inova Joint Replacement Center is fully accredited by The Joint Commission, earning the coveted Gold Seal of Approval™ for outstanding care in hip and knee replacements.
